HASITHA SENEVIRATHNE

Associate Software Engineer | Full-Stack, Cloud & Backend Applications
Colombo, Sri Lanka | +94 70 455 9948 | linkedin.com/in/hasitha24/ | hasitha24hs@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing and delivering scalable backend APIs, web, and mobile applications using Java (Spring Boot) and C# (.NET / ASP.NET Core). Proven track record of architecting microservices, optimizing complex SQL databases, and building modern frontends with React and Flutter. Skilled in applying OOP and SOLID principles, automated unit testing, and deploying containerized workloads using Docker, Kubernetes, AWS, and Azure CI/CD pipelines

TECHNICAL SKILLS

Languages: Java ,C#, SQL, TypeScript, JavaScript, Dart
Backend: Spring Boot , .NET / ASP.NET Core, C#, Entity Framework Core, RESTful API Design, Microservices, Node.js
Frontend & Mobile: React, Flutter, Redux, Angular, TypeScript, Tailwind CSS, Bootstrap, MUI
Databases: MS SQL Server, PostgreSQL, MySQL
DevOps & Cloud: Azure (App Service, Azure DevOps), AWS, Docker, Kubernetes, CI/CD, Linux
Engineering & Practices: OOP, SOLID Principles, Unit Testing (xUnit), SonarCloud / SonarQube, Git, Jira, Postman, Agile/Scrum

WORK EXPERIENCE

Twin Turbo Co. | Associate Software Engineer

Dec 2025 – Present

- Designed and built the official company web platform (twinturbo.co) using React, Node.js, and TypeScript, implementing SSR for optimal SEO and performance.
- Architected and built RESTful web APIs using C# and ASP.NET Core, adhering strictly to SOLID principles and clean architecture.
- Containerized application services using Docker and automated CI/CD deployment pipelines on Azure.

Dialog Finance PLC | Software Engineer Intern

Oct 2024 – Oct 2025

- Engineered backend microservices and secure RESTful APIs utilizing Java / Spring Boot and PostgreSQL.
- Implemented JWT authentication, automated unit tests using xUnit, and maintained high code quality through SonarQube analysis.
- Optimized database indexing and complex SQL queries, significantly reducing API response latency across core fintech modules.
- Participated in Docker containerization, Kubernetes orchestration, and Azure App Service deployments via automated CI/CD pipelines.
- Created internal admin dashboard interfaces using React, Redux, TypeScript, and modern UI component frameworks.

Nexeyo Solutions | UI/UX Designer & Mobile Developer Intern

May 2024 – Oct 2024

- Designed comprehensive UI/UX wireframes and prototypes in Figma for a construction management mobile platform.
- Implemented modular Flutter components and collaborated with the backend team for API integration.

KEY PROJECTS

Genie Mobile App (Dialog Finance)

- Technologies: Java, Spring Boot, React, PostgreSQL, Docker, Kubernetes, AWS

- Developed backend microservice features with JWT security layers, PostgreSQL query optimizations, and React admin portal components.

Twin Turbo Platform

- Technologies: Flutter, TypeScript, Vite, Vike, Docker
- Full-stack web and mobile platform featuring custom UI components, SEO rendering optimizations, and Docker containerization.

NexPOS System (Nexeyo Solutions)

- Technologies: Flutter, REST APIs, ZKTeco Hardware Integration, Biometric SDKs
- Managed feature development for NextPOS, integrating .NET REST services with full-featured Point-of-Sale (POS) devices.
- Configured hardware and software integrations for ZKTeco biometric fingerprint and attendance tracking devices.

Median Entertainment Application Server Infrastructure

- Technologies: Linux, Docker, Wine, Xvfb, Bash, Server Administration
- Managed server infrastructure and headless application server environments for Median Entertainment applications.
- Configured Linux environments using Wine and Xvfb (X Virtual Framebuffer) to seamlessly host and run Windows-native server applications.

Simple Expense Tracker Mobile Application

- Technologies: Flutter, Dart, SQLite / Local Storage, Provider / Riverpod, Material UI
- Developed a cross-platform mobile expense tracking application focused on intuitive UI/UX, minimal friction, and quick financial logging.

E-Seat Bus Booking System

- Technologies: React, SQL, REST APIs
- Optimized complex SQL queries and led frontend migration to React with Redux state management for a government public transport booking system.

Discord Support Agent & Automation Pipeline

- Technologies: Python, n8n, Gemini API, Asyncio/aiohttp, Tailscale
- Engineered an automated Discord support agent powered by discord.py, n8n, and Gemini 3.5 Flash.
- Implemented non-blocking asynchronous requests (aiohttp) with fallback mechanisms and memory state management, ensuring stable, context-aware user support over secure Tailscale tunnels.

CERTIFICATIONS & TRAINING

ASP.NET Core Essential Training – LinkedIn Learning
Docker Essential Training – LinkedIn Learning
AWS Essential Training for Developers – LinkedIn Learning

EDUCATION

BSc (Hons) in Software Engineering

NSBM Green University | 2021 – 2025

G.C.E. Advanced Level (Physical Science Stream)

Ananda College, Colombo 10 | 2017 – 2019
